## **DETAILED ACTION**

### ***Examiner's Amendment***

1. The following is an examiner's statement of reasons for allowance:

On page 1 line 3, after "No. 09/987,484, filed November 14, 2001," insert – US Patent 6,698,487 --.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance:

In a feed roll assembly to be used in conjunction with an apparatus for performing a master processing operation, the prior art does not teach or make obvious the concept of the feed roll mounting structure providing a pre-tension brake providing a pair of brake surfaces defining a flange when the feed roll mounting structure is removably mounted on the apparatus frame and the stock material is being unwound from the core, the core with the flange fixed thereon rotates relative to the feed roll mounting structure so that braking friction is created between the flange and the braking surfaces of the pre-tensioning brake in the manner claimed by the applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1734

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
